## PROFILE

Results-driven Software Developer with a strong foundation in Java, SQL and backend technologies. Skilled in full-stack development, problem-solving, and building scalable applications. Passionate about delivering high-performing and maintainable software solutions.

## TECHNICAL SKILLS

### Programming Languages

Java, SQL

### Web Technologies

HTML, CSS, JavaScript

### Frameworks & Libraries

ReactJS, Bootstrap and Tailwind CSS

### Version Control

Git, GitHub

### Soft Skills

Problem-solving, Analytical and Debugging Skills, Effective Communication, Teamwork

### Databases

MySQL, MongoDB

## INTERNSHIP EXPERIENCE

### Full-Stack Developer Intern - Besant Technologies, July 2024 - August 2025

- Built and deployed scalable backend services using Java and Spring Boot, improving stability and reducing server errors.
- Optimized MySQL queries and schema, reducing data retrieval time by 30% and improving API response speed.
- Developed and integrated RESTful APIs to connect backend services with frontend applications.
- Collaborated in code reviews, debugging, and performance tuning, ensuring maintainable and high-quality code.

## EDUCATION

U.G - B.E. Computer Science and Engineering, Dr. Sivanthi Aditanar College of Engineering

2020 – 2024

CGPA: 7.98

Tiruchendur

HSC, Sokkalal Higher Secondary School

2019 – 2020

Percentage: 66.2%

Mukkudal, Tirunelveli

SSLC, Sokkalal Higher Secondary School

2017 – 2018

Percentage: 85.8%

Mukkudal, Tirunelveli

## PROJECTS

### Live Polling & Chat System – Full Stack Web Application

- Built a real-time interactive polling and chat platform using React, Node.js, Express, and Socket.IO, enabling instant audience engagement.
- Designed teacher and student interfaces with live participant lists, polling controls, and dynamic result visualization.
- Implemented WebSocket-based event handling for real-time updates and integrated responsive UI using Tailwind CSS for consistent cross-device performance.

### ZestyWay - Food Ordering Web Application

- Built a full-stack MERN application for food ordering, featuring user and admin panels with secure role-based authentication.
- Enabled users to browse, filter, and order food items, while admins can add, update, and efficiently manage menu content.
- Integrated payment gateway, advanced cart management, and order tracking for a seamless end-to-end experience.

### BikeMatch Pro - Web Application

- Built the backend of a bike recommendation platform using Java, Spring Boot, and MySQL to match users based on preferences.
- Designed scalable RESTful APIs and ensured efficient data flow between services and the database.
- Optimized backend performance and improved data consistency through effective query structuring and system architecture.

## CERTIFICATES

• Java Full-Stack Development - Besant Technologies

• Complete Web & Mobile Designer (UI/UX) – Udemy
